Protect Scotland

Social posts

Post 1

There's a new way for us to stop coronavirus spreading, and it only takes a few minutes to do. The free Protect Scotland app helps with contact tracing, keeping the virus under control and protecting those you love. Download today →| protect.scot

Post 2

Help protect Scotland from coronavirus by downloading the free Protect Scotland app. As part of NHS Scotland's Test and Protect, it alerts you if you've been in close contact with another app user who tests positive, breaking the chains of transmission →| protect.scot

Post 3

The Protect Scotland app is the next step in fighting coronavirus. It's anonymous, private and free - and downloading it today will continue to help protect the progress we've made →| protect.scot

Post 4

Downloading the free Protect Scotland app means you can be quickly alerted if you've been in close contact with another app user who has coronavirus. Using minimal data, it also alerts others if you test positive, even if they are unknown to you→| protect.scot

Post 5

Alerting people who may have been exposed to coronavirus so they can isolate immediately is key to breaking the chains of transmission. The free Protect Scotland app does this, whilst ensuring your privacy. Download today →| protect.scot

Post 6

Using the free Protect Scotland app, and following FACTS, can protect you, your family and Scotland against coronavirus. We can make it work, if we work together. Download and share today →| protect.scot
